TOMORROW'S INSULATION TODAY

ACTIS CASE STUDY 2011

Alan Way, Colchester, Essex

Alan Way, Colchester, Essex

May 2011

2 Storey extension to existing house.

24m² of TRISO-SUPER 10 was used in an under rafter, pitched roof application.

Installation carried out by Neil Collison - Tel: 01206 515848

Product supplied by Jewson Colchester via Minster Insulation in Barking, Essex.

TRISO-SUPER 10 could have been installed with just 30mm PUR Board under the Local Authority Building Control guidelines, but instead was installed with 80mm PUR Board, as Neil Collison was looking to achieve the best u value possible, and therefore installed the maximum amount of insulation that could be fitted in the rafters.

ACTIS was chosen because it is the leading multifoil with the best thermal performance.

By using TRISO-SUPER 10, a key advantage is that the temperature in the extension will be comfortable all year round.
